## COVERAGE

### THE ISSUE

The insurance you pay for is only as good as the coverage you receive. As it is impossible to predict where your next loss might come from, it is important that your cover is as broad as possible so that it is more likely to cover a loss. Discovering an uninsured exposure by experiencing a loss is not a position anyone wants to be in.

### OUR SOLUTION

Our specialist policy wordings team helps you to make your coverage as broad as possible for your given exposures. By bringing our expertise to your insurance programme, we can deliver:

### BENEFITS

BENEFIT TO YOU	DESCRIPTION
A full review of your current coverage, highlighting potential areas for improvement:	The combination of our portfolio size and how well we coordinate across our Aviation & Aerospace Practice means we are well-positioned to provide you with the best coverage.
Multiple coverage enhancements at no additional premium:	Our policy wordings team will seek to identify as many coverage enhancements as possible at no additional premium. We will then use our broking experience and market strength to negotiate the broadest coverage on your behalf.
A strong advocate for you within the aviation industry:	We are a committed advocate for our clients in the marketplace and remain at the forefront of many of the aviation insurance industry's new coverage enhancements. For example, in recent years, our work on corporate manslaughter and pandemic clauses has led to these covers now being widely used throughout the aviation market.
