

FIRE PROTECTION SYSTEMS

DO YOUR FIRE PROTECTION SYSTEMS MEET YOUR BUSINESS NEEDS?

Fire protection systems are becoming increasingly complex, with new technologies being introduced at ever increasing rates.

The responsibility for choosing and implementing fire protection system designs is shifting from regulators to building owners and occupiers.

Many regulatory standards are aimed at human safety and may undermine property loss prevention which is crucial for business continuity. For the unwary, the pitfalls are plentiful.

COST EFFECTIVE FIRE PROTECTION SYSTEMS

Marsh Risk Consultants are independent of regulators and contractors, and can help you select and implement fire protection systems that meet your specific needs.

We will work with you to:

- Identify what your fire protection needs are
- Determine the fire protection systems that best meet these needs
- Implement reliable and cost effective fire protection system installation or improvements

Our approach to specifying and commissioning fire protection systems will provide your business with:

- Appropriate design (in terms of function, reliability and cost)
- Effective project management by helping you select the right contractor, review the contractor designs to ensure that they meet the specifications, review installation to minimise variations from agreed designs and help commission the system.
- Conduct training on operation, inspection and testing of the fire protection system.
- Help develop maintenance schedules and practices in line with best practices in the industry.

INDUSTRY FOCUS

These risk consulting services are of particular benefit to companies in the following industries:

- Auto ancillary
- Food and beverages
- Food products
- Information technology
- Dairy products
- Manufacturing
