

MODERNISING YOUR WORK HEALTH AND SAFETY MANAGEMENT

Is your business tired of chasing paper, struggling with work health and safety (WHS) compliance and in need of a fresh approach to WHS management? Marsh and cloud-based compliance software provider Donesafe are working together to provide a convenient solution to transform client WHS management needs.

Marsh and Donesafe help businesses comply with complex obligations – quickly, easily and affordably.

HOW CAN MARSH HELP YOUR BUSINESS

Marsh will help translate your old paper-based WHS management system onto Donesafe's state of the art cloud-based compliance system. Your existing policies and procedures can be maintained or renewed, and then transformed into bespoke forms, registers, checklists and workflows designed specifically for your business.

Marsh will help to:

- **Protect your business – all year**

Your business will receive a year-round, trusted adviser to keep an eye on your business compliance, health and safety. This means you can stay compliant, safe and risk-free.

- **Protect yourself from serious risk**

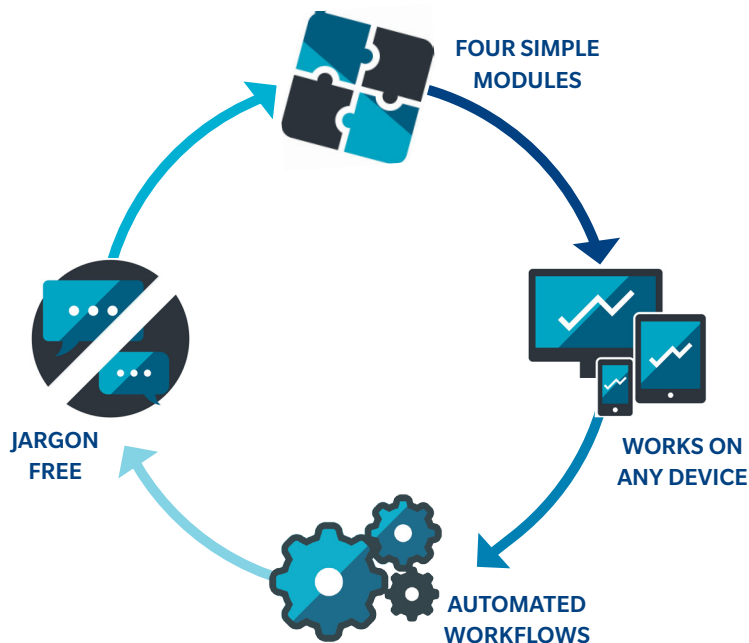

Did you know that businesses can be liable for up to \$3m for a worker injury? Worse still, did you know that officers of a business can also be fined up to \$600k and receive up to five years jail time? With Marsh and Donesafe, you will have access to online safety management software that all employees can access from a smartphone, computer or tablet – helping your workers help themselves.

- **Save time and money**

Rather than using paper or clunky, older systems, Donesafe's cloud-based safety management system can be updated as needs and legislation change. This means you can focus less on reporting and more on your core business.

ABOUT DONESAFE

Donesafe provides a cloud-based, end-to-end safety and compliance software platform built with the end user in mind. With simple, jargon-free solutions designed for everyday users, this software helps your business comply with legislation and enhances safety culture, without the headaches of a paper-based system.
